TRUSTONIC SHALL NOT BE LIABLE FOR ANY DAMAGES SUFFERED BY LICENSEE AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THIS DOCUMENT OR ITS DERIVATIVES.

1 What's New in TTS

1.1 Version identification

TTS 400A-r2

1.1.1 New Features

Support for Trustonic TEE version 311C.

1.1.2 Bug Fixes and improvements

Kinibi versions support

- ◀ This version now supports all Kinibi versions ranging from Kinibi 301 up to 400A.

Tests

- ◀ TUI legacy full screen color tests can now support higher resolutions.
- ◀ Test GC00600_WaitAndSysTime removed from this version.

1.1.3 Known issues

- ◀ Email reporting might fail when connected to some corporate networks. This is likely due to corporate firewall policies. In case your corporate network forbids transmission of emails from TTS, use cellular data connectivity instead.
- ◀ Test "00010_SystemMcRegistryPermissions" might return an inaccurate failure status on Android N.

2 INSTALLATION

The TTS package is delivered to you as a stand-alone zip file or as part of the Trustonic OEM package.

Once the package extracted, the TTS application can be found in the folder TTS/bin.

To install the application on the device, use the adb install command as follow:

```
adb install TTS.apk
```

3 TROUBLESHOOTING AND SUPPORT

If you are having issues using the TTS application, you can check our trouble shooting page at:

<https://trustonic.zendesk.com/hc/en-us/categories/200517982-Troubleshooting>

You can alternatively send support requests at: <https://trustonic.zendesk.com>
